

## Analysts, National Assessments Bureau

Listing #: 403366082

Company: Dept of PM Cabinet

Location: Wellington, Wellington

Listed: Mon, 29 Aug

Type: Full time, Permanent

The National Assessments Bureau (NAB), a unit of the Department of the Prime Minister and Cabinet, is looking for a number of analysts to join its multi-disciplinary team. The NAB is a part of the New Zealand Intelligence Community and produces reports for the Prime Minister, ministers and senior officials on events and trends affecting New Zealand's interests nationally and internationally.

The NAB would welcome expressions of interest from the following:

- Recent graduates or candidates with tertiary qualifications and/or relevant experience in international relations, political studies, economics, law, contemporary history, area studies, foreign languages and sciences. Interest in and understanding of the South Asia region would be of particular benefit.
- Candidates with at least three years of work experience in economics or economic policy making environments, and who have a strong understanding of global financial institutions and architecture.
- Candidates with at least three years of experience in a foreign policy, security and risk assessment or similar environment with a demonstrated strong understanding of New Zealand's global interests, global socio-political trends, and/or security issues. Positions in this area may also suit more experienced officials wishing to take the opportunity of working flexible or reduced hours.
- Technical experts or specialists with the ability to grasp the big picture and able to absorb highly technical information. A background in sciences and/or engineering, including a higher tertiary qualification, would be beneficial.

You will need to be able to demonstrate very strong research and analysis skills, flexibility, and the ability to communicate effectively both verbally and in writing. Foreign language skills are desirable; strong knowledge and understanding of international issues is essential.

Applicants must be New Zealand citizens and be able to obtain and maintain a very high level security clearance to be considered.

We would also welcome secondments from other New Zealand Government agencies.

**Bioinformatician**

Listing #: 400411263

---

Company:	AgResearch Limited
Location:	Palmerston North, Manawatu / Wanganui
Type:	Full time, Permanent
Listed:	Wed, 17 Aug
Your reference #:	AGR1262

---

- This position is initially at Palmerston North with a possibility of relocation to Mosgiel, Dunedin depending on business needs
- Fixed-term for 12 months with the possibility of renewal for another 12 months

Many of the world's most amazing scientific discoveries are the result of someone 'taking a closer look'. It's this inquisitive nature and relentless search for answers that fuels scientific advancement. And it's also what we'd like you to apply to us, right now. Mind you, you won't need to look too hard to discover AgResearch is the best place to showcase the skills you have developed to date in your career as a Bioinformatician.

At first glance you'll see we are New Zealand's largest research institute -world leaders in pastoral research working at the leading-edge of innovation. Scratch the surface a little more and you'll find all the diversity and intellectual challenge an experienced Bioinformatician could ask for. You'll be involved in everything from the analysis of high-throughput genomic and gene expression data to the design, development, implementation and testing of bioinformatics tools and pipelines. This is a highly collaborative role where you will be working with Scientists on a regular basis thus requiring a good knowledge of genetics and molecular biology.

Our people are at the pinnacle in their professions, so with your related postgraduate qualification, and solid skills in bioinformatics you will not only fit right in, you'll hit the ground running. An outstanding communicator, time manager and relationship builder, you'll also come to us with a thorough knowledge of Unix, web based technologies and scripting language.

AgResearch is a unique organisation at the forefront of our field, and as far as your future's concerned, that makes us well worth a closer look. There are many benefits waiting to be discovered here, so isn't it time you experienced them?

To find out more about AgResearch visit our website [www.agresearch.co.nz](http://www.agresearch.co.nz) or contact Dr Nauman Maqbool on 07 838 5043 or email [nauman.maqbool@agresearch.co.nz](mailto:nauman.maqbool@agresearch.co.nz)

Applicants for this position should have NZ residency or a valid NZ work permit.

---

## Customer Support Representative

Listing #: 398289241

Company:	SLI Systems Inc
Location:	Christchurch City, Canterbury
Type:	Full time, Permanent
Listed:	Tue, 09 Aug
Your reference #:	637655

Most search technologies use complex algorithms to determine which results should be returned for a query. Our patented Learning Search technology takes relevance a step further by learning from site visitors' behaviour over time to deliver more relevant results. One of our products is an Ecommerce Site Search product that is designed specifically for sites which sell products online and require advanced product merchandising. Other products in our range include a user-generated search engine optimization (SEO) service that automatically optimizes pages for search engine spiders; and the dynamic building of site navigation pages by creating product groups or "facets" to show similar products together allowing customers a powerful way to merchandise products and information.

The role of the Customer Support Representative (CSR) will be to help us support SLI clients through direct communication via the phone and email. This position acts as the primary point of contact between SLI Systems and the client base, and as such the candidate should be professional, articulate and energetic. You will be handling all requests and issues and should also have excellent time management skills.

The CSR's day to day responsibilities will include the following:

- Respond to support requests about use of SLI products
- Interface with engineering as needed to resolve customer support issues/questions
- Train clients on the use of SLI products
- Use Content Relationship Management (CRM) system to track support requests and activity
- Provide input to Product Managers on new services/products/features requested by clients
- Follow and enhance the SLI customer management processes
- Pro actively engage with assigned customers

The key skills required for this role include:

- Bachelors Degree in computer science and a minimum of 1 year work experience in a client services/relationship role
- Outstanding oral and written communication skills a must, including clear articulation of English
- Must be able to present technical concepts to non-technical users
- Proven ability to work independently, without administrative support
- Presentation (MS PowerPoint) and public speaking experience
- Attention to detail, highly organized, with an absolute focus on quality of work
- Positive, self-starter attitude with desire to exceed client expectations and ability to work extended hours when required
- The Customer Support Representative will work closely with the US-based sales team and the New Zealand-based engineering teams
- Project management experience
- Salesforce.com experience would be beneficial
- Familiarity with Search Engine Optimization

Applicants for this position should have NZ residency or a valid NZ work permit.

**EARTHWORKS / GEOTECHNICAL FIELD TECHNICIAN**

Listing #: 401499541

Company: Geotechnics Limited

Location: Auckland City, Auckland

Type: Full time, Contract/Temp

Listed: Mon, 22 Aug

Your reference #: 2011 - Fixed Term

- ✦ Full Time / Fixed Term
- ✦ Until 31 May, 2012
- ✦ Newmarket, Auckland

Geotechnics Ltd is a leading provider of testing and calibration services and equipment to the geotechnical, civil, and environmental engineering disciplines. The Auckland office is currently looking for a full-time Earthworks/Geotechnical Field Technician for a fixed term period ending on the 31st May 2012.

This position involves civil/geotechnical field testing and associated laboratory work. You will be part of a team, but individually looking after one or more large projects under the direction of the team leader. The job involves monitoring earthworks fill quality, contract supervision and testing.

Preference will be given to applicants with relevant experience but on the job training will be given. The role needs a reasonable degree of physical strength for using and lifting test equipment. An average competency with Microsoft Excel is also necessary. The ability to cope with flexible work hours is essential, as overtime and weekend work will be required from time to time.

For more information on Geotechnics Ltd, visit our website: [www.geotechnics.co.nz](http://www.geotechnics.co.nz) or to submit your application for this role, click on the Apply Now button.

Applicants for this position should have NZ residency or a valid NZ work permit.

## Engineering Opportunity

Listing #: 404422244

Company:	Pan Pac Forest Products Ltd
Location:	Napier, Hawkes Bay
Type:	Full time, Permanent
Listed:	Fri, 02 Sep
Your reference #:	666184

Pan Pac Forest Products Limited, based in the Hawke's Bay, is one of New Zealand's leading fully integrated forestry and wood processing companies.

The Pulp Division operates a mechanical Pulpmill, 2 large bio-mass fired boilers, a steam turbine generator and a wood-chipping production unit. The Pulpmill is currently being expanded and upgraded to export in excess of 260,000 tonnes of thermo mechanical pulp to an international market.

An employment opportunity has arisen for an Engineer to join the Pulp Operations Team at our Whirinaki mill site, north of Napier.

The successful applicant will be a key member of the Pulp Division team. You will have a desire to challenge the status quo and uncover opportunities on a site with well-established large scale and sophisticated production processes. The role will expose you to a diverse range of technical and engineering challenges to broaden your experience and demonstrate your full potential. You will also join at a time of significant development and have a unique opportunity to commission significant new equipment and implement new processes.

The successful applicant will provide process engineering expertise to Pulp Operations, including:

- ✦ Investigations to optimise process performance, economy, efficiency, and environmental aspects of plant operations, and producing performance reports as required
- ✦ Assisting with the commissioning of significant new pulp and effluent plant and processes
- ✦ Undertaking projects supported by appropriate technical and financial analysis, from conception through to implementation
- ✦ Developing and implementing quality systems and environmental procedures
- ✦ Providing technical assistance for Process and Product Improvement projects

The ideal candidate will have a tertiary qualification in Engineering, Science or Technology. They will also possess a high level of self-motivation, confidence, and enthusiasm to learn and progress in a capital intensive production environment.

Applicants for this position should have NZ residency or a valid NZ work permit.

## Executive Assistant/Analyst

Listing #: 403334698

Location: Horowhenua, Manawatu / Wanganui

Type: Full time, Permanent

Pay and benefits: By negotiation

Listed: Mon, 29 Aug

Your reference #: EA:001

I am looking for a person with great organisational skills to provide that essential personal backup that I currently do not have. This role can be much more than an Executive Assistant, morphing into an analysts position; although really it can be both.

I need a personal assistant who can get things done that I am not getting too. You need to have some analytical (numeracy or system dissection) skills, in order to understand processes (and then figure out what is wrong with them). You will get some guidance; have a lot of frustrations, a fair bit of satisfaction and considerable personal development.

You must:

- have the ability to work on your own without a lot of supervision or direction
- be skilled in using standard Microsoft Office products;
- be able to file and retrieve information accurately and quickly;
- be able to spell;
- learn quickly.

You will have very good keyboard skills and be able to organise your time efficiently.

Hours of work are flexible (if you have something better to do on any given day you can do it –I just won't pay you for that) and in any given week they will be more than 20hrs but less than 60hrs.

If you are looking more towards an analysts role you would still have to do the things I have set out above and I would prefer you had a degree. It can be in earth science, biochemistry, dentistry, accounting, steganography, law or eco-engineering (to name a few); what's important though is that you have the discipline that tertiary learning usually brings to a person's mind to undertake the role I have in mind.

In any event, you will be a New Zealand resident, have a sense of humour, like dogs, and have references that say you are honest, hard working and generally a nice person. (Of course if your references were brutally honest, I would find that refreshing.) Your referees will be interviewed in person so they will need to be in New Zealand and accessible.

You should be familiar with the internet; its analytical tools and websites generally. Social websites sort of count but if you only visit "facebook" and "trademe" then we won't get on.

The office is small, remotely staffed, open plan and informal. You will need a car to get to and from work as we are based about 10km from the Levin Post Office.

A job description will be sent to interested persons once I receive the information I have asked for below.

Applicants for this position should have NZ residency or a valid NZ work permit.

---

### Contact this advertiser or apply online

I guess this part tests your use of the spell checker, your command of grammar and the ability to follow instructions. Email an introductory letter, keep it simple but I want to know who you are. Keep all the woolly stuff for the CV that you should also attach. Include contact details (landlines and mobile). If you have a facebook page, include that too. Your letter should be in by 23 September, although if by some miracle I do find the right person before then I will shut this off sooner.

## Graduate Java Developer - North Shore

Listing #: 405347007

Company: Enterprise Recruitment

Location: Auckland City, Auckland

Type: Full time, Permanent

Listed: Tue, 06 Sep

Your reference #: E111178

Our client is a well established technology start up based on the North Shore. They have developed a niche in the global internet security and internet monitoring field that is taking the world by storm. Based on the North Shore they have recently opened offices in the US and the UK. They are now looking to expand their growing development team as they move to further develop their technologies to maintain their competitive edge.

They are now looking to hire a recent Graduate from a recognised Australasian University to join their very talented R+D team. This role will appeal to a talented and ambitious recent Graduate with solid Java skills. You will have completed a degree in Computer Science, Software Engineering or a related discipline and have attained an A grade average over the course of your studies. Our client is looking for a candidate who is passionate about software development with evidence of having completed a number of personal software projects. We are seeking a driven individual who has very strong spoken and written English and would be comfortable contributing to team design discussions.

Working with a skilled solutions Architect, as a member of a growing development team you will be involved from the applications design phase through development, testing and delivery of appropriate and effective solutions. These development projects will involve you at the very sharp edge of solutions design in the internet security, traffic monitoring and communications technology.

In addition to sound Java skills you will ideally have some knowledge of automated tests tools such as JUnit or TestNG, relational database design and SQL, including optimising queries and indexes, web markup languages and techniques including HTTP, HTML, CSS, Javascript, JSON, AJAX and some knowledge of TCP/IP protocol suite.

These opportunities will provide you with, challenging, interesting projects, excellent career development and a place in a happy motivated and expanding team. An excellent salary package dependent on experience is offered. Please submit your CV online (in MS Word format only) and for further information please call Barry O'Brien on 027 499 2733. We look to hearing from you.

## Graduate or Recent Graduate Opportunities

Listing #: 398051611

Company: Asset Forestry Logistics

Location: Rotorua, Bay Of Plenty

Listed: Mon, 08 Aug

Type: Full time, Permanent

Asset Forestry Limited is a specialist forestry logistics business established in New Zealand in 1993. The 35 staff based in New Zealand and Gippsland (near Melbourne) have particular expertise in the application of logistics information technologies to wood supply operations.

Recognised as a market leader, Asset is growing fast and looking for new members to join regional operations, with positions available in Whangarei, Tokoroa and Gisborne in NZ, and in Victoria (AUS). This is a fantastic opportunity for graduates and/or appropriately qualified candidates looking for:

- \* Operations management, office based with a component of field work
- \* A fast-paced, challenging environment where you can learn and grow as quickly as you wish – your earnings will grow as fast as you do
- \* A small, young team - enjoy a relaxed culture where the defining expectation is that the job is done to the highest standards
- \* Work hard and live life to the full is our mantra
- \* Dynamic, demanding, varied work – no two days are the same
- \* A way to use technical, interpersonal and practical skills in one role
- \* The chance to learn from people just a few years ahead of you
- \* The opportunity to gain a great overview and develop networks at all levels of one of Australasia's most exciting primary industries

Using specialist dispatch software developed in-house, the logistics team plan, execute and monitor to ensure successful outcomes for our clients. The challenge is to balance the micro requirements of hundreds of contractors to achieve the macro objectives of the forest owners. You will be coordinating and scheduling harvesting contractors and logging trucks to uplift loads, thinking about best overall utilisation of the fleet and minimum cost of distribution, solving a myriad of problems that occur along the way. You will be monitoring and reporting on production, inventory and delivery targets, negotiating with suppliers and customers to do the extra yards and meeting them in the field when issues demand direct communications.

If this sounds interesting, we would like to receive a cover letter and CV providing evidence that you:

- \* Have a recent degree or diploma (relevant fields include primary industry training in forestry, agricultural science and commerce, engineering, logistics, transport)
- \* Thrive on challenging work
- \* Enjoy solving problems using logic and common sense
- \* Are good with numbers and planning and have a great memory for detail
- \* Have the ability to talk to and develop relationships with a wide range of people
- \* Can influence others using empathy, diplomacy and confidence
- \* Love the adrenaline rush of juggling several balls at once and have a passion for achieving great results against all odds
- \* Are practical and want a real hands-on role

For your commitment and outstanding work ethic you will get exposure to, and build relationships with a wide cross section of the industry from machinery contractors to operational managers and senior corporate management. This might otherwise take years to achieve at a normal graduate entry level role. Asset believes in developing and promoting staff from within and with our recent and planned growth we believe Asset offers an exciting opportunity to ambitious people looking to make their mark in business. Exposure to our clients also provide for opportunities to move into management positions in a wide range of organizations including multi-national companies

Applicants for this position should have NZ residency or a valid NZ work permit.

## Natural Science Tour Manager & Chief Astronomy Gui

Listing #: 401504246

Company:	Earth & Sky Ltd
Location:	Mackenzie, Canterbury
Type:	Full time, Permanent
Listed:	Mon, 22 Aug
Pay and benefits:	Salary

We are an emerging business located in the serene surroundings of Lake Tekapo, and we are looking for the right candidate to support the General Manager in continuing to develop and uphold outstanding research and educational programs at Mt. John Observatory, Cowan's Hill Observatory, and other associated locations in the Mackenzie Region. The role focuses heavily on the effective delivery of guided science tours (primarily astronomical) and an entertaining and informative interpretation of the Southern Hemisphere's night sky. Reporting directly to the General Manager this is a hands-on

managerial position: in addition to daytime administrative duties you will be an active participant in nightly tours. The selected candidate will be passionate about educating and exciting visitors (especially youth) through guided tours and the designing of new educational platforms.

The ideal applicant must have past experience in supervising and developing tours (structural design, maximizing full potential, etc.); drafting and managing rosters; training and instructing guides; organizing and compiling historical records; liaising with multiple parties; and mediating and coordinating between folks of different cultural backgrounds. As our venture caters heavily to the Asian sector, particularly the discerning Japanese traveller, and one of our company's founders is a Japanese national, the successful candidate needs to show he/she has extensive experience serving and working alongside Japanese – i.e. he/she can clearly demonstrate that he/she can embrace Japanese staff and patrons in Japanese and feels comfortable negotiating language differences and subtle language nuances in Japanese.

Applicants for this position should have at least two years of astronomical outreach experience, a valid p-endorsement on their driver's license, interest in residing in a rural community for an extended period of time, a minimum of two years teaching experience at the primary or secondary level (as we are steadily catering to more and more school groups) would be an advantage, and ideally possess knowledge about the Mackenzie Region.

Applicants for this position should have NZ residency or a valid NZ work permit.

## Pilot Plant Technician

Listing #: 404153074

---

Company:	Cadbury
Location:	Dunedin, Otago
Type:	Full time, Contract/Temp
Pay and benefits:	\$50,000 - \$55,000 dependant on experience
Listed:	Thu, 01 Sep
Your reference #:	CAD2520

---

- Gain excellent exposure within a market leading organisation
- Career growth and development opportunity
- Provide your technical expertise where it will really make a difference!

Progress your career at Cadbury where we take the creation and selling of our fun products very seriously.

In this position you will be responsible for the manufacture of pilot scale products in the Dunedin Pilot Plant. This will include developing new products and processes and liaising with R&D and manufacturing colleagues to scale up to the plant.

This is a diverse role that will have a number of key accountabilities, these include:

- Manufacturing of bench top and pilot scale samples to the highest quality for consumer studies.
- Developing manufacturing procedures for lab, pilot and factory scale.
- Generating and documenting making records for all pilot plant work.
- Managing the maintenance and calibration schedule for lab and Pilot plant equipment.
- Playing a key role in housekeeping systems in the pilot plant.
- Managing inventory of laboratory supplies.

Ideally, you will have some experience within manufacturing or R&D coupled with an understanding and interest in engineering processes and/or machines and equipment. Experience in food manufacturing would be advantageous although is not essential.

This role requires a confident, 'hands-on' approach with the ability to be self-directed, plan your own work day and meet deadlines with minimal supervision. Highly developed communication skills are a prerequisite for this role as the ability to communicate with both internals and externals cross functionally (within Supply Chain, Quality, and Research & Development) will be critical to your success.

Shape your career within our global organisation where diversity, growth and performance are rewarded!

Applicants for this position should have NZ residency or a valid NZ work permit.

## Quality Improvement Lead - Canpac

Listing #: 402635476

---

Company:	Fonterra
Location:	Hamilton, Waikato
Type:	Full time, Permanent
Listed:	Fri, 26 Aug
Your reference #:	06995

---

Utilising proven people management experience you will provide hands on practical leadership for the Quality Improvement Team of five Production Systems Co-ordinators at Canpac. As a key member of the management team, attendance at plant meetings and presentations will be an integral part of your role.

With a focus on quality and ensuring full site regulatory compliance, you will be adept at building key relationships both internally and externally in order to influence and support continuous improvement initiatives. Employ your experience implementing and maintaining of risk management programs and HACCP in a quality and product safety environment.

Strong problem solving skills and detailed focus will enable you to monitor and audit the effectiveness of systems operating within our manufacturing and non-manufacturing functions on site, with an emphasis on good manufacturing practice. You will also provide robust review and approval of all quality documentation, ensuring review and closure of CAPA activities.

Your professionalism, communication and engagement skills will be fundamental in developing and maintaining strong relationships with customers. Critical to success in this role and you will be measured on your ability resolve customer queries on product quality in an efficient manner.

A tertiary qualification in Science, Dairy or Food Technology coupled with strong analysis and problem identification skills are highly desired. An understanding of HACCP and NZFSA regulatory requirements is an advantage.

As a quality professional you will have experience in implementation and maintenance of product safety and quality management systems. You will have an excellent knowledge of GMP requirements as relevant to the food industry, ideally in nutritionals, and/or the pharmaceutical industry.

This position is crucial to the success of our business, and for the right person this could lead to an exciting and rewarding career. We'll provide the development opportunities - you bring your motivation and passion.

Applicants for this position should have NZ residency or a valid NZ work permit.

## RESEARCH, DEVELOPMENT AND INNOVATION ROLE

Listing #: 402668765

Location: Christchurch City, Canterbury

Type: Full time, Permanent

Listed: Fri, 26 Aug

Your reference #: AP2811

- Market Leader
- Innovative Environment
- Project Focused

The New Zealand Merino Company is an award winning New Zealand success story. Through innovation and their brand story they have transformed one of New Zealand's most exclusive natural fibres into a premium branded product sought after by discerning global clients.

This role is an outstanding opportunity for a talented and ambitious professional to join the NZ Merino team. You will be primarily responsible for developing and securing funding for market linked R & D and innovation projects consistent with NZ Merino's business strategies, and then managing these projects to provide commercial outcomes for the business and partners. You will also provide a link between the Innovation and Marketing teams to ensure the integration of activities and the delivery of outcomes that make a real difference for key brand partners.

Working in a fluid and fast paced environment will be of great appeal to you and will also showcase your ability to be agile, adaptable and proactive in the face of change. You will have a strong business acumen with the ability to identify market-linked research, development and innovation opportunities that will contribute to NZ Merino's continued commercial success. Exceptional interpersonal skills will allow you to work collaboratively with science and technology providers, brand partners and growers, and develop strong relationships internally.

Applicants for this position should have NZ residency or a valid NZ work permit.

## SENIOR HYDROLOGY/HYDROLOGY TECHNICIAN

Listing #: 404198558

---

Company: Horizons Regional Council

---

Location: Manawatu, Manawatu / Wanganui

---

Type: Full time, Permanent

---

Listed: Thu, 01 Sep

---

Your reference #: HOR606

---

Looking for job variety and satisfaction?

Do you want to challenge yourself?

Are you looking for a career that has a large outdoor component? An exciting opportunity exists with the Horizons Regional Council Hydrology Team for a motivated Senior Hydrology Technician or Hydrology Technician.

Our Hydrology Team prides itself on remaining at the forefront of the industry by utilising the best available technology and systems.

As one of our technicians based in Palmerston North your day will involve the field collection of data from various parameters such as River Flows, Rainfall, Groundwater, Water Quality and Air Quality as well as data verification and analysis. You will also need to be physically fit and confident around water.

Ideally you will hold a relevant qualification and/or have a background in either environmental data collection or an electronics field. But if you have a science, trade or technical background and you are prepared to shape a new career through on-job training and targeted courses then you could be the person that we are looking for.

Applications close at 5.00pm on Friday 16 September 2011.

Applicants for this position should have NZ residency or a valid NZ work permit.

## SOLID WASTE MANAGER

Listing #: 404134492

Company: Rotorua District Council  
Location: Rotorua, Bay Of Plenty  
Type: Full time, Permanent  
Listed: Thu, 01 Sep  
Your reference #: T99147

Applications are invited from suitably experienced and enthusiastic individuals for the above position within the Works Department of the Infrastructure Services Group of Council.

Your key challenge as part of the team is to manage Council's solid waste assets and services and to promote these services to the community. In addition to this, you would also respond to and resolve all public complaints and enquiries relating to the above activities.

The successful candidate will need to be self-motivated with an aptitude for environmental matters and an ability to work both individually and as part of a team. Computer literacy is essential along with strong organisational skills, excellent communication and interpersonal skills, and a 'can-do' attitude. The successful appointee should have a technical tertiary qualification in Engineering or Science and it is desirable that applicants have a sound knowledge of Solid Waste management or related environmental experience with a minimum of five years experience in this field.

All applicants are required to submit a completed application form and a current CV. Position details, including job description and application form are available online at [www.rdc.govt.nz](http://www.rdc.govt.nz) or from Rotorua District Council's HR team.

Applications close 4.00pm – Friday, 23rd September 2011 and may be posted, delivered or emailed to:

Human Resources Department,  
Rotorua District Council, Civic Centre,  
1061 Haupapa Street, Private Bag 3029,  
Rotorua Mail Centre, Rotorua 3046  
Email: [hr@rdc.govt.nz](mailto:hr@rdc.govt.nz); Phone: 07 348 4199

Rotorua District Council operates an equal employment opportunity policy

A spirited team, a dynamic future... be part of it!

Applicants for this position should have NZ residency or a valid NZ work permit.

## Senior Analyst/Policy Analyst - Strategic & System

Listing #: 402389788

---

Company:	OCG Consulting Ltd
Location:	Wellington, Wellington
Type:	Full time, Permanent
Listed:	Thu, 25 Aug
Your reference #:	WSL41290TM

---

We have exciting opportunities for high calibre policy/senior analysts with a proven track record in strategy and policy advice.

The Ministry of Science and Innovation is a new agency with an exciting and ambitious mandate. Its role is to maximise the contribution science and innovation make to the economic growth of New Zealand and its social wellbeing.

Our System Strategy and Policy group is a small, high calibre team with a challenging and rewarding task ahead. Our strategy and policy work is interesting, fast paced, and critical to New Zealand's economic, social and environmental policy agendas.

Now is an exciting time to join our team.

Our work programme includes developing a strategy for New Zealand's science and innovation system, leading significant interagency policy projects, and working alongside our business and the science sector to develop the Ministry's advice on science policy.

We have several opportunities across the strategy and policy teams. We're keen to hear from you if you have a proven track record in strategy or policy analysis and advice and bring:

sound strategic, systems and critical thinking skills

strong analytical ability including applying and adapting frameworks and tools (eg economics)

an excellent post graduate level tertiary qualification

strong relationship and stakeholder management skills

We employ the best and most capable people to meet our high expectations of performance. We offer a lively and supportive team culture, a great career path and an environment where excellence is recognised and staff are encouraged to develop their own talents and potential.

The work is challenging and exciting, the demands immediate and the learning curve steep - if you're up for the challenge, we'd love to hear from you.

For more information and a confidential discussion contact Wendy Sleath at OCG Consulting on 04 498 8963, or apply online.

Applicants for this position should have NZ residency or a valid NZ work permit.

## Senior Engineering Geologist - North Shore Based

Listing #: 403324213

---

Company: Harper Smith Global Recruitment Ltd

---

Location: North Shore City, Auckland

---

Listed: Mon, 29 Aug

---

Type: Full time, Permanent

---

Take away your city commute and base yourself out of the North Shore office for this specialist Geotechnical Consultancy !

The organisation is a leading provider of geological and geotechnical services. Their range of ground engineering services includes site investigation, geotechnical interpretation, analysis and design, and construction advice. They offer exposure to a diverse range of clients and the opportunity to progress your career development through sponsored training programs.

As a member of the Auckland Geotechnical team, this position involves geological input to a range of projects. This company has a mix of projects from land development to infrastructure needs. You will be expected to take a leadership role in providing mentoring to junior geologists in the office. Additionally, it is important that you have had exposure to managing multiple projects at the same time.

### Experience and Skills Needed:

Relevant Degree qualification in Geology/Earth science

Proven experience as an Engineering Geologist working within a NZ consultancy environment.

Excellent verbal communication skills

Strong mentoring skills of junior staff.

Strong report writing skills.

Ability to work across a variety of projects.

Computer literate.

**Software Developer**

Listing #: 399079340

Company:	SLI Systems Inc
Location:	Christchurch City, Canterbury
Type:	Full time, Permanent
Listed:	Fri, 12 Aug
Your reference #:	642700

Most search technologies use complex algorithms to determine which results should be returned for a query. Our patented Learning Search technology takes relevance a step further by learning from site visitors' behaviour over time to deliver more relevant results. One of our products is an eCommerce Site Search product that is designed specifically for sites which sell products online and require advanced product merchandising. Other products in our range include a user-generated search engine optimization (SEO) service that automatically optimizes pages for search engine spiders; and the dynamic building of site navigation pages by creating product groups or "facets" to show similar products together allowing customers a powerful way to merchandise products and information.

Are you smart and tech savvy with a university degree in computer science or engineering? Are you working, shopping, playing and living on line? Are you innovative and looking for challenge? Do you know what eCommerce is and do you want to collaborate with fellow digital natives?

We are looking for enthusiastic graduates to join our rapidly expanding Christchurch engineering team.

This is an opportunity to develop innovative new technologies that will be used by some of the world's largest eCommerce websites. Supporting several hundred eCommerce sites globally, and serving many millions of page-views per day, SLI offers an exciting environment in which to work with other passionate and talented people on challenges that are truly international in scale.

All you need is some working knowledge of:

- ▶ Java
- ▶ JavaScript (including jQuery)
- ▶ HTML
- ▶ PHP
- ▶ Basic experience with UNIX Systems

It would also be to your advantage to have some experience with HTML 5, CSS3, SEO techniques and practices, Subversion and handheld web development (mobile phones, iPhone, Blackberry etc).

Applicants for this position should have NZ residency or a valid NZ work permit.

**Technical Advisor, Spatial Data Services**

Listing #: 404377303

---

Company: Ministry of Economic Development

---

Location: Wellington, Wellington

---

Type: Full time, Permanent

---

Listed: Fri, 02 Sep

---

Your reference #: 11-160

---

New Zealand's petroleum and mineral resources are extremely valuable national assets and unlocking their potential has been identified by the New Zealand Government as a key opportunity to help stimulate economic growth. New Zealand Petroleum and Minerals is a new business unit within the Ministry of Economic Development that has been established to manage these assets, maximising their value in an environmentally responsible way.

As a result of this, we are looking for a Technical Advisor to assist the Senior Advisor in delivering high quality spatial data services.

With your relevant industry experience and tertiary qualification, you will bring a wealth of geo spatial knowledge in the following areas; core spatial data services to support the capture and management of geospatial and geosciences information, geospatial analysis to support the development of public policy and business strategy, provision of spatial data to sector stakeholders and the provision of high quality cartographic services. As a motivated individual, you will be driven to becoming an expert in this field and take pride in delivering world class client services to the highest standards.

A key component of this role will be your ability to think analytically by swiftly diagnosing complex ambiguous problems. As an exceptional communicator, you will be able to clearly communicate technical issues across a broad range of stakeholders in non-technical terms. Experience with ArcGIS Geographic Information Systems and knowledge of best practise spatial data management methodologies is expected. Knowledge of geosciences sufficient to enable a broad understanding of the mineral and petroleum industry in New Zealand is desirable, but not essential.

If you want to make a difference to the petroleum and mineral sectors in New Zealand, work with a friendly and supportive team and have the skills to be successful in this role, then we would love to hear from you.

MED is committed to career development and offers a supportive learning environment. Our employees are encouraged to move throughout the Ministry to work with other teams, branches and stakeholders to develop the breadth and depth of their knowledge and skills. This in turn, enables our organisation to respond quickly to new priorities and maintain our reputation of delivery.

Applicants for this position should have NZ residency or a valid NZ work permit.
