

Otago

District Health Board

Poari Hauora-ā-rohe ki Ōtāgo

Medical Physicist Registrar

Dunedin

40 hours per week

Just finished your Physics degree and wondering 'what now?'

- **Want to be innovative?**
- **Want a career in health?**
- **Love the idea of continued learning?**

There's nothing worse than finishing that long degree and wondering what now?! We have the solution for you if you have just graduated in Physics and want a job that will take you places!

If the idea of working in health and undergoing further training doesn't make you want to cry then why not consider joining the Radiation Oncology Service of the Otago District Health Board as a Medical Physicist Registrar?

As a Medical Physicist Registrar you will learn to apply the principles of physics to patient care. You will be trained to work as part of a team with other clinical scientists, doctors and technologists. The duties within a hospital involve use of sophisticated technology, particularly devices involving ionising radiation, to diagnose and to treat patients.

You would spend one month at the employing hospital before commencing the papers for an MSc (Medical Physics - Clinical) at the University of Canterbury. Even if you have already commenced or completed the MSc course you are still eligible.

Please attach an updated CV and cover letter by applying online: http://www.healthdownsouth.co.nz/index.php?pageLoad=3&jobCategory=Allied&job_id=1959 or contact Milair Ryalls, phone 03 470 9604 or email milair.ryalls@osdhbs.govt.nz

Closing Date: 15th February 2010.
